“Flushable Wipes”= 100 hours overtime for Public Works in March, and complicated the treatment process which keeps YOU safe & healthy.

PLEASE DO NOT FLUSH WIPES OF ANY KIND!!!!

“FLUSHABLE” WIPES ARE NOT SO FLUSHABLE....

Did you know that baby wipes may specify they are flushable, but they should not be put in our wastewater system? This also includes adult wipes, cleaning wipes (Clorox, Lysol), medical wipes, etc.

In fact, the only paper product that should be “flushed” is toilet paper. It is the only paper designed to break down as it travels through the wastewater treatment process.
